personal Expense Tracker Application:

- All the financial decision activity that you make are unable to keep a track of it.
- This app make your life easier by helping you manage your finances efficiently.

Social Impact:

- It will help the people to track their expense and also alert when you exceed the limit of your budget.

Business model / Impact:

We can provide the application in a subscription based.

Existing Solution:

Recommended for python. IBM DB2.
flask, Docker, kubernetes, IBM cloud etc..

Nutrition Assistant Application:

- However, although food packaging comes with nutrition labels, it's still not very convenient for the people to read.

Social Impact:

- It will help the people with providing proper nutrition and helps in maintaining a healthy life styles.

Business Model/ Impact:

- Social media is the best way to spread word about our application.
- Catering and targeting the fitness people with the help of local Gyms.

Recommended technology stack:

- python, flask, IBM DB2, Docker Kubernetes, IBM Cloud, etc..

Skill/Job Recommender Application:

- Student will have the skill but they are unable to get the desired job they have.
- Student will have benefits they will get know which the desired jobs.

Social Impact:

- Student will have benefits to know which jobs suits them based on the skill test.

Plasma Donor Application:

- It is very difficult to find the respective blood group donors when anyone is in need.

Social Impact:

- We can save life who are in need of plasma.

Business model / Impact:

- We can collaborate with government and use a utility app to help the people who are in need of plasma.

Recommended Technology Stack:

- Python, Flask, IBM DB2, Docker.

Containment zone Alerting Application:

- The World Health Organization has declared an outbreak of the novel coronavirus, COVID-19, pandemic across the world.

Social Impact:

- It will alert the people on containment zones.

Business model / Impact:

- Govt can utilise the application on the alert people when they are entering to a containment zone.

- Retail inventory management is the process ensuring you carry that shopper's want, with neither too little's nor too much on hand.

Business model/Impact:

- By providing Service to the small and large scale retailers.

Recommended:

- python, flask, IBM DB2, Docker.

News track Application:

- As our are to very these days when often feel we need more than a hrs. day cope the every thing in th our schedules.

HTML css:

Core Concepts:

- Breakpoints are the building blocks of responsive design. use them to control when your layout can be adapted at a particular viewport or devices.

- Use media queries to architect your CSS by breakpoint.
